

# BPI MOLECULAR CATALYTIC TINTS • STANDARD COLORS

The unique chemical structure of our tints makes them more stable and reduces tinting time. The tint molecules bond to the lens and become part of the lens structure. The lens cures in the tinting process and has a more scratch resistant surface.

Choose from more than 188 BPI® colors. BPI® Tints are available in 3 ounce (88 ml) plastic bottles and money saving six-packs. Each 3 ounce bottle makes one quart (946 ml) of solution and tints hundreds of lenses. Some colors are available in quart (946 ml) bottles. BPI® tints are now also available as Pills®.

 BPI® Black BPI# 46300 The darkest of sunglasses shades with no red	 BPI® Sun Gray BPI# 34000 A neutral gray for sunglasses shades	 AO Pearl BPI# 29100 The most subtle of grays	 BPI® Gray BPI# 31000 A neutral light to medium gray	 Transchromatic Gray BPI# 4301 Ever-changing gray.
